Srii Akhillessh Gaddam

Data Engineer — Python — DevOps — Cloud
Southfield, Michigan 48034 | 646-875-2400 | sriiakhillessh@gmail.com
LinkedIn | Portfolio

Professional Summary

Cross-functional engineer with experience spanning **Python application development, DevOps/cloud automation, and data engineering**. Comfortable working across the application lifecycle - from Python and SQL development to AWS infrastructure, CI/CD, monitoring, ETL workflows, and production support. Known for collaborating with engineering and business teams to remove manual work, improve reliability, and solve operational problems. Hands-on experience with **Python, SQL, PySpark, Databricks, AWS, Terraform, Jenkins, Docker, and data pipeline automation**.

Technical Skills

Programming: Python, SQL, PySpark, Spark SQL, Bash, Pandas, JavaScript
Data Engineering: ETL/ELT, Databricks, Apache Spark, Delta Lake, Auto Loader, Airflow, Data Validation, Data Modeling
Cloud & DevOps: AWS (S3, Glue, Lambda, Redshift, IAM, CloudWatch), Terraform, Jenkins, Docker, Git, GitHub, CI/CD, Linux
Web & Databases: REST APIs, HTML, CSS, JavaScript, PostgreSQL, Snowflake, Greenplum

Professional Experience

Rocket LLC **May 2025 – Sep 2025**
Data Engineer Intern *USA*

- Automated end-to-end data processing workflows using **Databricks, PySpark, Spark SQL, and Delta Lake** to transform raw business data into standardized, analytics-ready datasets.
Automated end-to-end data processing workflows using **Databricks, PySpark, Spark SQL, and Delta Lake** to transform raw business data into standardized, analytics-ready datasets.
- Developed reusable **data validation, reconciliation, and exception-handling** checks to improve data quality and speed up issue resolution with business and engineering teams.
- Built **Python and Pandas** reporting automation that reduced repetitive manual processing and improved recurring operational and analytical reporting.
- Implemented incremental ingestion and transformation workflows using **Databricks Auto Loader, Delta Lake, and medallion architecture** principles.
- Supported delivery of curated datasets into cloud reporting layers, improving reliability and accessibility for downstream analytics.

LTIMindtree **Jan 2021 – Jun 2024**
DevOps Engineer *Client: First Citizens Bank*

- Built **CI/CD pipelines** to deploy Python- and SQL-based ETL workloads across development, testing, and production AWS environments, reducing manual deployment effort and release failures.
- Provisioned and maintained AWS data services including **S3, Glue, Lambda, Redshift, IAM, and CloudWatch** using **Terraform**-based infrastructure automation.
- Developed **Python and Bash** utilities to automate banking-file ingestion, data validation, job triggering, and operational reporting, improving processing speed and reducing repetitive work.
- Monitored production data pipelines using **CloudWatch dashboards, logs, and alerts**, troubleshooting failed jobs, late-arriving files, and processing bottlenecks to reduce downtime.
- Implemented **IAM roles, encryption, secrets management, and environment-level access controls** to protect sensitive financial data and support stable production operations.

Blinkit **Feb 2019 – Mar 2021**
Python Full Stack Developer Intern *India*

- Learned and contributed across the full application lifecycle, supporting **Python-based backend development, SQL data handling, REST APIs, and front-end integration** in a collaborative engineering environment.
- Worked with the team to automate repetitive operational and reporting tasks using **Python and SQL**, saving manual effort and giving teams faster access to business information.
- Contributed to team-led product and automation improvements that helped increase sales by approximately **30%** while reducing time spent on repetitive processes.

Education

Lawrence Technological University **2024 – 2026**
Master of Science in Computer Science *GPA: 3.6/4.0*

Sreenidhi Institute of Science and Technology **2018 – 2021**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.5/4.0*

Certifications

Databricks Certified Data Engineer Associate | Snowflake SnowPro Core Certification | AWS Certified Data Engineer - Associate

Achievements

- Received the **Bronze Award twice** for high-impact contributions to enterprise engineering initiatives.
- Selected to support **campus hiring interview panels**, assisting with candidate evaluation and technical hiring activities.
